## 2017 RECRUITMENT RATE CARD

**Quarterly Investment Level** – Print rate pricing has five (5) investment levels based on the advertiser’s quarterly Investment in newspaper products. Pricing discounts are built into each investment level to help fund incremental investment and thus incremental results.

**Frequency Thresholds** - Results of a 3-year study, including 146,000 advertisers, in 14 U.S. markets found that advertisers generating strong, regular results from their advertising were adhering to local “momentum thresholds” when constructing advertising campaigns. Advertisers not meeting these minimum thresholds have only a 20 percent chance of generating successful results. We have adopted these minimum frequency thresholds into our pricing to significantly increase the probability of our advertisers generating results.

## 2017 RECRUITMENT PRINT ENHANCER RATES

Enhancer products are regular print or digital products directed at audiences based on content, geography, or may be products targeted to non-subscriber households. Use of enhancer products helps the advertiser reach minimum frequency thresholds and greatly increases potential results. Results from a 3-year study suggested that advertisers who invest a minimum of 25% of advertising campaign dollars into Enhancer products significantly increase results.
