

From the Desk of [Anne Nesse](#)  
2012 Candidate for the Idaho Legislature  
House of Representatives

To: Senator Crapo, concerning voting to NOT extend the Bush era tax cuts to the more wealthy in our society,

I humbly represent at least 43% of the population in Coeur d'Alene, when I tell you that extending the Bush era federal tax cuts to the more wealthy in our society, will not help our local economy or our national economy.

I received easily 43% of the vote in our conservative district in Coeur d'Alene, and would have won, if more of the younger voters had participated in our voting process. I and my husband Dr. Rolf Nesse were at the doors of over 7,000 voters. We talked to 2,000 voters personally in my recent campaign for the state legislature.

By a ratio of roughly 9 to 1: voters of all income levels here do not believe in "trickle down economics". Voters here understand that unless the wealthy are actually creating jobs at which citizens can make a livable wage, that giving a tax cut to this group does NOT help our economy, or help to pay off our federal deficit that we owe primarily to ourselves in entitlements like medicare and social security.

Anne Nesse,  
Candidate for State House of Representatives, city of Coeur d'Alene
