

Ednetics Connect

- 100 Mbps to 10 Gbps connection speed
- Dedicated MPLS network, multiple routes
- Primary access locations across the Northwest
- Transition assistance available
- 24/7 proactive service monitoring
- Web based customer portal
- Conga compatible

High-speed dedicated network service.

Dedicated Network

Ednetics Connect is a dedicated, high performance MPLS network that supports the growing needs of K12 environments. Multiple fiber routes ensure redundancy and high availability. Ednetics Connect is designed and optimized to deliver phone service, video collaboration, IP-based security systems, online student testing, email, and day-to-day online activities.

High Speed and Capacity

Ednetics Connect delivers 100 megabit to 10 gigabit service to support collaboration, rich media experiences including streaming video and audio, and large-scale downloads. Ednetics Connect provides high availability and performance through its multiple peering relationships with Tier 1 backbone providers.

Superior Connectivity

Ednetics Connect provides customers with fast, consistent access to public and private cloud services. Get advanced, bandwidth-intensive services through primary access locations across the Northwest.

Ednetics Customer Portal

Monitor and track Internet usage with Ednetics Portal, a web-based interface that lets customers track bandwidth consumption, peak usage times, and other important data points. Ednetics Portal provides detailed, real-time information on usage in a printer-friendly format.

Dedicated Support

Ednetics Connect offers proactive, round-the-clock circuit monitoring to ensure the highest level of reliability and availability. Ednetics Connect customers receive expert support from the Connect team, including transition assistance if needed.

Secure, high speed,
