Re: Clagstone Conservation Easement

To whom it may concern,

The Bonner County Commissioners signing this letter are not in favor of the Clagstone Conservation Easement. There has been no coordination with the County as to its effect on long term development, the County's comprehensive plan, our future tax base, its impact on surrounding properties and our natural resources. In addition, there is currently a Bonner County approved development plan in place for 12,000 acres of the property. There has been no communication with the County from the property owners, any State agencies nor Federal agencies on this proposal. This proposal would affect 20 square miles within the boundaries of Bonner County and needs to be vetted at the County level.

Your consideration of our concerns is appreciated

Sincerely,

BONNER COUNTY BOARD OF COMMISSIONERS

Todd Sudick, Commissioner

Glen Bailey, Commissione
