

# Selway-Middle Fork Collaborative Forest Landscape Restoration Program (CFLRP)

Summary of Accomplishments Fiscal Years 2010-2013

**OVERVIEW** -- The purpose of the Collaborative Forest Landscape Restoration Program is to encourage the collaborative, science-based ecosystem restoration of priority forest landscapes. The Selway-Middle Fork proposal is a product of collaboration. It is based on sound science and restoration strategies developed at the forest, county, state, regional and national levels. All outputs are a product of ecological restoration activities.

**PROJECT FUNDING** – From fiscal years (FY) 2010-2013, the Selway-Middle Fork project has netted nearly \$12.2 million in appropriated CFLR funds and more than \$10.6 million in matching contributions to accomplish restoration work in the Selway-Middle Fork area.

## JOBS CREATED OR MAINTAINED

One of the purposes of the CFLRP is to benefit local communities by providing local employment or training opportunities. Numbers are generated from the Treatment for Restoration Economic Analysis Tool (TREAT).
