

**FIRST AMENDMENT PETITION FOR REDRESS OF VIOLATIONS TO AN ELECTION SYSTEM THAT HAS POTENTIALLY BEEN COMPROMISED.**

Pursuant to Article I, VI and Amendments 1, IX and X and XIV and XV and XIX and XVI of the US Constitution, the citizens of Spokane County, Washington, hereby exercise our constitutional protected right to petition government (i.e., County Commissioners) for redress of grievances regarding violations of the Constitution of the United States of America and diminishing confidence in our election system.

Such demand is further supported by the Washington State Constitution.

**Whereas** the Founding Fathers and all States that have ratified the Constitution have clearly recognized the need to ensure that voters' rights are not to be 'abridged' in any manner, and

**Whereas** the Secretary of State for Washington and our County Auditor have both declared that the equipment used in the voting system is and was not connected to the internet, however anomalies exist to indicate otherwise, and

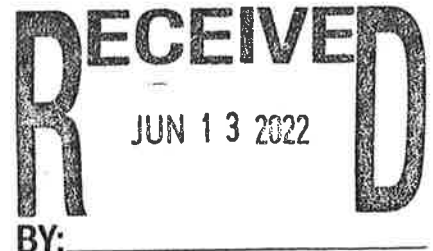

**Whereas** we recognize that specific process and procedures exists within RCW29A, as well as processes identified by both the Secretary of State and County Auditor, we further recognize that such processes and procedures were and are not being followed therefore cannot be trusted, and

**Whereas** a review of the voter rolls from the 2020 election, shows that numerous votes had been cast which contributed to an erosion of trust in the voting process to the point that an election could and should be decertified and

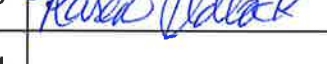

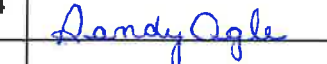

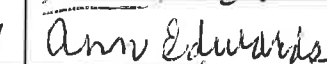

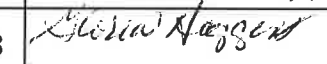

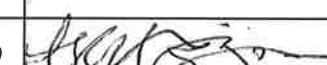

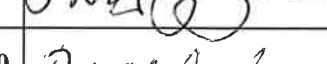

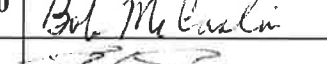

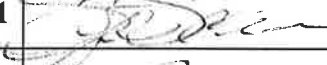

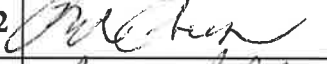

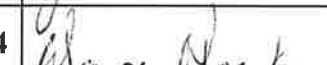

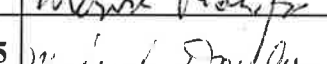

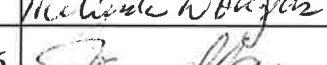

**NOW THEREFORE**, in accordance with Article IV Section 4 of the US Constitution that the States are guaranteed a Republican form of government, that our elected County Commissioners are our direct representatives, who in accordance with Article VI Section 3 of the Constitution for the United States have taken an oath "to support" the Constitution for the United States, **we demand that ALL County Commissioners take action to perform a Comprehensive Process Audit of the election system ahead of the elections for 2022.** Such Audit must include a **1)** a comprehensive review of the equipment used and their connection to the internet, along with a review of the equipment itself and any potential to be connected to the Internet along with any changes to the source code on the equipment in the last 4 years, **2)** a full review of the voting system from the time that ballots are printed all the way through to final counting of the votes cast with reports provided, **3)** a complete review of any and all phantom voters and a clear review of the voter rolls.

Respectfully submitted this 22<sup>nd</sup> day of April 2022 by:
